Family Legacy

Though Parachilna was founded in 2013, it's built on a legacy that dates back to the 1930s, when the Riera family first stepped into the world of lighting. Three generations later, we continue that journey—with a renewed spirit and a vision rooted in craftsmanship, innovation, and design culture.

Parachilna is a platform for bold ideas. We collaborate with designers and artisans who challenge convention, blending tradition with experimentation. Through light, we explore emotion, material, and meaning—always aiming to create objects that feel both timeless and forward-thinking.

Humble luxury

At Parachilna, we believe true quality takes time. It comes from patience, intention, and a deep respect for craft. We embrace the process — sketches, tests, adjustments — knowing there's beauty in every step, not just the final piece.

But precision doesn't mean rigidity. We leave space for play, for mistakes, for joy. We don't take ourselves too seriously, and that freedom fuels creativity. What we create has soul because it's shaped by honesty, humility, and a genuine love for the journey.

Off the grid from Barcelona

Parachilna is based in Barcelona, a city where tradition and innovation have always gone hand in hand. Just outside, in the industrial area of Colonia Güell — once shaped by Gaudí — we work in a space full of history and quiet energy that naturally flows into what we create.

Our name comes from a remote town on the edge of the Australian desert, a symbol of how we see ourselves: on the border of the known, always exploring. We turn bold ideas into real objects, giving them shape here, in the heart of Barcelona.

All products are Made in Spain.

For sustainability purposes and long-term durability, our collections are fully demountable and repairable.

Atelier Oi

Atelier Oi is the result of an alliance of three, rooted in humanity and art alike. It is about sharing values and ideals. The trio has been linked for 25 years through the intangible bond of the desire to grow and venture together on a journey that never denies their individual paths. Their alliance brings together open and creative minds, sharing their visions.

Collection: Oïphorique

Jaime Hayon

After several years working in various interior design studios in Barcelona and teaching in the Master's in Spatial Design, Guido, has been independently developing his own products with the aim of creating unique lighting objects, guided by the sole principle of finding a core concept that structures the entire project and remains present throughout the process and final outcome.

Collection: Aballs, Chinoz, Lighto, Ma-Rock

Jordi Veciana

Jordi Veciana is an industrial designer based in Barcelona, specializing in lighting, product design, and architecture. After earning his degree in Barcelona, he gained experience with designers like Massimo Vignelli and Ralph Lauren in New York. In 1998, he opened his own studio focused on lighting, hospitality, and retail design. In 2017, he co-founded with Skye Maunsell, a network for creative communities, and they collaborate on various design projects.

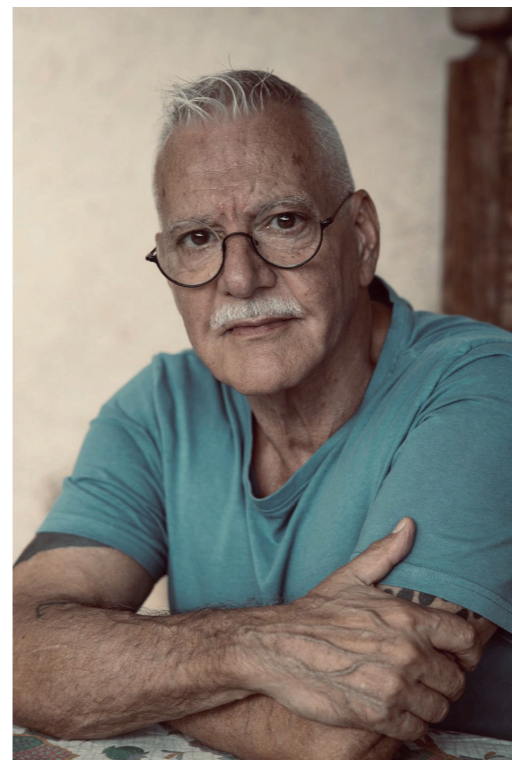

Collection: Alistair, B15, Petra

Guido Valin

After several years working in various interior design studios in Barcelona and teaching in the Master's in Space Design, Guido, has been independently developing his own products with the aim of creating unique lighting objects, guided by the principle of finding a core concept that structures the entire project and remains present throughout the process and final outcome.

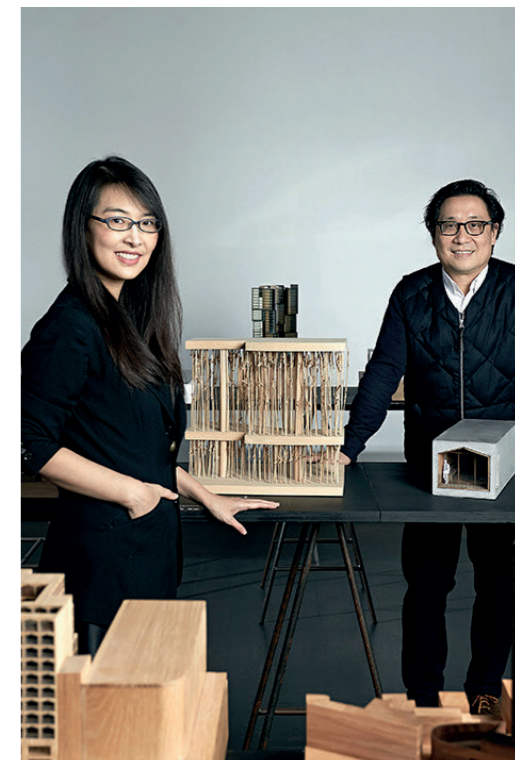

Collection: Topuro

Josep Aregall

Josep Aregall Fusté (Barcelona, 1957) is a Catalan interior designer. He studied at the Eina School in Barcelona, where he earned his degree in interior design in 1977. He began his career collaborating in the studio of Pepe Cortés. In 1983, he established his own studio, working on interior design, product design, temporary installations, and visual merchandising. Much of his work has focused on commercial interiors, particularly the development of retail store chains.

Collection: Alta Costura

Neri&Hu

Neri&Hu works internationally providing architecture, interior, master planning, graphic, and product design services. Currently working on projects in many countries, Neri&Hu is composed of multi-cultural staff who speak over 30 different languages. The diversity of the team reinforces a core vision for the practice: to respond to a global worldview incorporating overlapping design disciplines for a new paradigm in architecture.

Collection: Bai, Denglong

Partisans

PARTISANS is an award-winning Toronto-based architecture studio that specializes in the integration of design and technology, invention and programming, culture and creative services. Led by Alex Josephson, Pooya Baktash and Jonathan Friedman, the studio is a diverse team of architects, researchers, storytellers, entrepreneurs, builders, and cultural enthusiasts devoted to a cause: smart, high-performance design that strives to make the improbable possible.

Collection: Gweilo

Sebastian Herkner

Sebastian Herkner (born 1981) studied Product Design at HfG Offenbach University of Art and Design. During his studies he began to focus on designing objects and furniture, honing his keen sense for materials, colors and textures. In the year 2006 Sebastian Herkner founded his own studio. Since that time, he has designed furniture, lamps and smaller items.

Collection: Manila

Stephen Burks

Stephen studied architecture at the Illinois Institute of Technology and Product Design at IIT'S Institute of Design, as well as attending Columbia University's Graduate School of Architecture. After years spent traveling between New York and Europe, as well as living abroad in Tokyo & Milan, Stephen became an independent designer at the turn of the millennium, when the famed Italian manufacturer Cappellini put his first pieces into production.

Aballs

designed by Jaime Hayon

2013

The Collection

Aballs balances the refinement of ceramics with the softness of opal blown glass. Its timeless design and finishes in black, white, and gold adapt to various applications: table, suspension, wall, and chandelier in different sizes.

Alta Costura

designed by Josep Aregall

1992

The Collection

Inspired by haute couture, this collection plays with material tension—steel provides stability while the PVC-coated paper shade twists fluidly. The result is a lighting piece that is both functional and expressive.

Manila

designed by Sebastian Herkner

2019

The Collection

The Manila collection draws inspiration from the traditional Spanish “Mantón de Manila” silk shawl, commonly associated with flamenco dancers. This collection elegantly combines artisanal blown glass with a plissé textile diffuser, resulting in a sophisticated lighting family.

Oïphorique

designed by Atelier Oï

2014

The Collection

The Oïphorique collection, designed by Atelier Oï, features a tall steel structure draped with a light gray pleated textile diffuser. The lamp includes a motor that generates an up-and-down movement, creating a dynamic deformation of the diffuser. The structure houses two LED tubes that emit a warm light. The collection is available in two sizes for both floor and ceiling.

Petra

designed by Jordi Veciana

2020

The Collection

Petra epitomizes minimalist elegance through its use of natural alabaster. Each lamp features a cylindrical base and a conical shade, both meticulously carved from a single piece of this translucent stone, allowing for a warm, ambient glow.

Topuro

designed by Guido Valín

2025

The Collection

Topuro is a lamp born from the desire to work with the idea of the dematerialization of light—how it moves through space while gradually losing its intensity. To achieve this, it employs the concept of a series as a metaphorical gradual progression.
